

Basic Required Field Validation

```
<form name="myForm" onsubmit="return validateForm()">
  Name: <input type="text" name="username"><br>
  <input type="submit" value="Submit">
</form>

<script>
function validateForm() {
  let name = document.forms["myForm"]["username"].value;
  if (name == "") {
    alert("Name must be filled out");
    return false;
  }
}
</script>
```

Email Format Validation

```
<form onsubmit="return validateEmail()">
  Email: <input type="text" id="email"><br>
  <input type="submit">
</form>

<script>
function validateEmail() {
  let email = document.getElementById("email").value;
  let pattern = /^[^ ]+@[^ ]+\.[a-z]{2,3}$/;

  if (!email.match(pattern)) {
    alert("Please enter a valid email address");
    return false;
  }
}
</script>
```

Password Match Validation

```
<form onsubmit="return checkPassword()">
  Password: <input type="password" id="pass1"><br>
  Confirm Password: <input type="password" id="pass2"><br>
  <input type="submit">
</form>
```

```
<script>
function checkPassword() {
  let pass1 = document.getElementById("pass1").value;
  let pass2 = document.getElementById("pass2").value;

  if (pass1 !== pass2) {
    alert("Passwords do not match!");
    return false;
  }
}
</script>
```

Number Range Validation (e.g., Age)

```
<form onsubmit="return validateAge()">
  Age: <input type="number" id="age"><br>
  <input type="submit">
</form>

<script>
function validateAge() {
  let age = document.getElementById("age").value;
  if (age < 18 || age > 100) {
    alert("Age must be between 18 and 100");
    return false;
  }
}
</script>
```
